

HIGH TEMPERATURE PROBES

OVEN/FURNACE SENSOR – OVHT (A-1288)

DESCRIPTION:

This sensor is designed for both residential and commercial oven use. The OVHT can be used as part of an oven temperature control system or an oven over-temperature protection device.

The OVHT probe tip and probe extension are constructed of stainless steel to withstand temperature extremes of modern self-cleaning ovens.

Also, this sensor can be used for similar applications in commercial drying and curing ovens as well as furnaces. Maximum operating temperature of the OVHT is 550°C. The OVHT sensor is equipped with a stainless steel bracket to mount the probe securely.

Customer probe diameters, lengths and mounting systems can be designed to fit the OVHT to your application. Consult the application engineering department for design options.

TEMP (°C)	R@T (ohms)
-40	720,000
25	60,000
